

Innovations in Fuel Cell Technologies

Edited by

Robert Steinberger-Wilckens and Werner Lehnert

Forschungszentrum Jülich, Jülich, Germany

RSC Publishing

Contents

Part 1: Micro-applications and Micro-systems

Chapter 1 Printed Enzymatic Current Sources	5
<i>Matti Valkiainen, Saara Tuurala, Maria Smolander and Otto- Ville Kaukonieni</i>	
1.1 Introduction	5
1.2 Enzyme Catalysts in Fuel Cells	6
1.3 Enzyme-based Microsystems for Power Production	8
1.3.1 Biofuel Cells Constructed in a Liquid Chamber	8
1.3.2 Miniature Membraneless Biofuel Cells	11
1.3.3 Biofuel Cell Constructions Suitable for Large-scale Production	11
1.4 Printing Processes as Manufacturing Methods for Power Sources	15
1.4.1 Types of Thin and Printable Power Sources	17
1.5 Enzymes in Mass-production Applications	17
1.6 Printing and Coating of Enzymes	19
1.6.1 Screen Printing	19
1.6.2 Inkjet Printing	20
1.7 Printed Biofuel Cells	21
1.8 Conclusions	24
References	25
Chapter 2 Potential of Multilayer Ceramics for Micro Fuel Cells	28
<i>Michael Stelter</i>	
2.1 Challenges of Micro Fuel Cell System Development	28
2.1.1 Cost of Assembly	29

2.1.2 Component Failures	29
2.2 Introduction to Multilayer Ceramics	29
2.3 Fuel Cell Relevant Subsystems and Geometries	30
2.3.1 Geometrical Shaping	30
2.3.2 Relevant Features of Fuel Cells	32
2.4 Examples	36
2.5 Conclusion	38

Part 2: High-Temperature Polymer Electrolyte Fuel Cells

Chapter 3 Trends in High-Temperature Polymer Electrolyte Fuel Cells **45**

Werner Lehnert, Christoph Wannek and Roswitha Zeis

3.1 Introduction	45
3.2 The Oxygen Reduction Reaction	46
3.2.1 Tafel Slope and Reaction Pathway	46
3.2.2 The Adsorption of Phosphoric Acid Molecules and Phosphate Anions on Platinum	49
3.2.3 Enhanced ORR Activity: Platinum Alloy Catalysts and Alternative Electrolytes	53
3.3 Membrane Polymers	54
3.4 Catalyst and Diffusion Layer Development and Membrane Electrode Assembly Manufacture	58
3.5 Fuel Cell Performance and Durability	61
3.6 Stacks	66
3.7 Perspectives	69
References	70

Chapter 4 Large Auxiliary Power Units for Vessels and Airplanes **76**

Ralf Peters and Andreas Westenberger

4.1 Introduction	76
4.2 Motivation	77
4.3 Conditions for Auxiliary Power Unit Operation	82
4.3.1 Aeronautical Applications	82
4.3.2 Maritime Applications	86
4.4 Fuel Cell Technologies	87
4.4.1 Fuel Cell Types and their Applicability for Large Auxiliary Power Unit Systems	87
4.4.2 Fuels for Large Auxiliary Power Units	93
4.4.3 Fuel Processors	100
4.4.4 Fuel Cell Systems	101
4.5 System Evaluation	112
4.5.1 Focus on Aeronautical Systems	113
4.5.2 Focus on Maritime Systems	136

4.6 Conclusions	140
Acknowledgement	143
References	143

Part 3: Novel Fuels

Chapter 5 Going Beyond Hydrogen: Non-hydrogen Fuels, Re-oxidation and Impurity Effects on Solid Oxide Fuel Cell Anodes	153
<i>Mark Cassidy, Jan Pieter Ouweltjes and Nico Dekker</i>	

5.1 Introduction	153
5.2 Carbonaceous Fuels	157
5.2.1 Fuel Resources and Processing Options	157
5.2.2 Conventional Solid Oxide Fuel Cell Anodes	159
5.2.3 Improved Anodes	168
5.3 Other Alternatives to Hydrogen	177
5.3.1 Ammonia	177
5.3.2 Hydrogen sulfide	178
References	179

Chapter 6 Direct Carbon Fuel Cells	190
<i>P. Desclaux, S. Nümberger and U. Stimming</i>	

6.1 Electrochemical Oxidation of Carbon	190
6.1.1 Thermodynamics	191
6.1.2 Mechanism	192
6.1.3 Boudouard Reaction	193
6.2 Different Types of Direct Carbon Fuel Cells	193
6.2.1 Molten Carbonate Electrolyte	194
6.2.2 Molten Hydroxide Electrolyte	196
6.2.3 Solid Oxide Electrolyte	198
6.2.4 Other Concepts	200
6.3 Comparison of Different Carbon Fuels	207
6.4 Conclusions	209
References	210

Part 4: Modelling and Lifetime Prediction

Chapter 7 Integrating Degradation into Fuel Cell Models and Lifetime Prediction	217
<i>Andreas Gubner</i>	

7.1 Introduction	217
7.2 Background	218
7.3 Basic Solid Oxide Fuel Cell Modelling Theory	220
7.4 Calculations and Results	227

7.4.1 Determining the Area Specific Resistance	227
7.4.2 Experimental Validation	228
7.4.3 Simulation of the Current—Voltage Behaviour	231
7.5 Degradation Monitoring by Area Specific Resistance Simulation	234
7.6 Extensions of the Model	236
7.7 A Simple Lifetime Prediction Model	237
7.7.1 Some Literature Results	237
7.7.2 Development of a Non-linear Area Specific Resistance Over Time Behaviour	238
7.8 Calculations	241
7.8.1 Constant Current Density	241
7.8.2 Varying Local Current Density and Fuel Utilisation Influence	242
7.8.3 Change of Local Current Density and Area Specific Resistance Profile over Time	244
7.9 Conclusions	245
7.10 List of Symbols Used in this Chapter	245
Acknowledgements	247
References	247
Chapter 8 Accelerated Lifetime Testing for Phosphoric Acid Fuel Cells	249
<i>John Donahue, Ned CiPollini and Robert Fredley</i>	
8.1 Introduction	249
8.2 Background	249
8.3 Experimental Design	253
8.4 Testing	254
8.4.1 First Generation Testing: Pot Tests and Corrosion Potential Measurement	254
8.4.2 Second Generation Testing: Potential Control and Monitor Current	256
8.4.3 Third Generation Testing: Inter-cell Effects	258
8.5 Conclusions	260
Acknowledgements	261
References	261
Part 5: Hydrogen Generation and Reversible Fuel Cells	
Chapter 9 Electrolysis Using Fuel Cell Technology	267
<i>A. Brisse, J. Schefold, C. Stoots and J. O'Brien</i>	
9.1 Introduction	267
9.2 Low-temperature Electrolysis	269
9.2.1 Introduction	269
9.2.2 Commercial Systems	270

- 9.2.3 Performance 270
- 9.2.4 Development Issues 271
- 9.3 High-temperature Steam Electrolysis 271
 - 9.3.1 Introduction 271
 - 9.3.2 Solid Oxide Electrolyser Cells 273
 - 9.3.3 High-temperature Electrolyser Stacks 279
 - 9.3.4 System Development 280
 - 9.3.5 Summary 282
- References 283

Chapter 10 Hydrogen Production by Internal Reforming Fuel Cells 287

Kas Hemmes

- 10.1 Introduction 287
- 10.2 International Developments Reported in Literature 289
- 10.3 Co-production of Hydrogen and Power 290
 - 10.3.1 Mode 1: High-efficiency Mode 293
 - 10.3.2 Mode 2: Constant-current Mode 294
 - 10.3.3 Mode 3: High-power Mode or Constant (Low) Voltage Mode 295
- 10.4 The 'Superwind Concept' 298
- 10.5 Hydrogen Production from Carbon Using a Direct Carbon Fuel Cell 300
- 10.6 Conclusions 303
- References 304

Part 6: Outlook

Chapter 11 Products, not Technology: Some Thoughts on Market 311

Introduction Processes

Robert Steinberger-Wilckens

- 11.1 Introduction 311
- 11.2 Background 312
- 11.3 Technology Phasing-in versus Disruptive Development 312
- 11.4 Battling Incumbent Technology 317
- 11.5 Paradigm Shifts and Succession of Generations 318
- 11.6 Transforming Technology into Products 320
- 11.7 Added Value, Special Markets and Allowable Cost 323
- 11.8 Outlook 330
- Acknowledgements 331
- References 331
